Jimmy Mullis

CHIEF INFORMATION OFFICER

Atlanta, GA | 404.253.6055
jmullis@polsinelli.com

Jimmy Mullis serves as Polsinelli's Chief Information Officer, leading the firm's technology strategy, infrastructure, cloud services, enterprise applications and innovation initiatives. Working closely with firm leadership, he aligns technology investments with business objectives to strengthen client service, enhance security and deliver modern digital capabilities across the enterprise.

With more than 30 years of information technology leadership experience, including more than two decades in the legal industry, Jimmy has led complex technology transformations that support organizational growth and operational excellence. His experience spans cloud transformation, cybersecurity, infrastructure modernization, knowledge management, information governance and enterprise applications, as well as strategic technology investments that position organizations for long-term success.

Before joining Polsinelli, Jimmy served as Chief Information Officer at Morris, Manning & Martin, where he spent 13 years leading the firm's technology organization. In that role, he directed enterprise modernization initiatives that helped prepare the firm for sustained growth and its successful merger with Taft. Earlier in his career, he held senior technology leadership positions across the private sector, building and leading high-performing teams while modernizing complex technology environments and advancing business-focused technology strategies.

Jimmy is particularly focused on the responsible adoption of artificial intelligence, Zero Trust security principles, cloud-first architecture and data-driven decision-making to help organizations innovate, strengthen resilience and meet evolving client and business needs.
