

Mechanical Engineering & Medical Devices Patent Prosecution

Polsinelli's Mechanical Engineering & Medical Devices Patent Prosecution practice considers client service the top priority. In doing so, we capture all aspects of a client's intellectual property protection and prepare for the intended uses, including licensing, monetization, investment portfolios, and patent prosecution or patent litigation.

Our team includes patent attorneys, patent agents and scientists highly experienced in the full range of IP considerations. We leverage that experience to help clients establish and leverage their intellectual property portfolios to advance their business priorities and market position. When representing those who work with mechanical engineering and/or medical device technologies, understanding the functionality, implementation, design and construction of the device is vital to providing the best protection possible. We work with every facet of the medical device or mechanical engineering product, and our team is also experienced in technologies having controls and other software-related components.

Representative technologies handled by the practice include:

- Medical devices and medical equipment
- Mechanical
- Automotive
- Robotics
- Optics
- Materials
- Oil field
- Consumer devices
- Aerospace and Defense
- Transportation

We also collaborate with our colleagues in other practice groups across the firm, including:

- Biotechnology and Life Sciences
- Chemical
- Electrical Engineering & Computer Science Patent Prosecution
- Product Design & User Interface
- Patent Post Grant Proceedings
- Patent Litigation
- Corporate & Transactional

Our attorneys have assisted a variety of clients ranging from individuals to *Fortune* 50 companies. We were ranked Tier 1 Nationwide for Patent and Technology Law by U.S. News & World Report 2023 "Best Law Firms" Report and among the Top 1% Best Performing Law Firms Overall by Patexia 2022 Patent Prosecution Intelligence Report. We were also included on three of Juristat 2021 reports for having one of the best track

records against difficult examiners, ranking No. 4 on the list of firms that most often prosecute in front of difficult examiners and were named one of the Top Patent Firms in 2021.
