

Natalya Dvorson

COUNSEL

Washington, D.C. | 202.772.8494

ndvorson@polsinelli.com

Natalya Dvorson brings over a decade of experience advising clients on the development, protection and strategic deployment of intellectual property. With a background in computer science and a deep familiarity with complex technologies, she counsels companies on patent mining, patent prosecution, global patent portfolios, due diligence, freedom-to-operate, invalidity, and infringement opinions, licensing, and technology transfers.

Before joining Polsinelli, Natalya served as a partner at an IP-focused firm and previously worked as a software developer at Hughes Network Systems. She advises on IP strategy across complex technology landscapes, often at the intersection of innovation, regulation and commercialization.

Natalya's practice spans a range of industries and technologies, including:

- AI and machine learning
- Autonomous systems
- Power and sustainability technologies
- Optical devices and photonics
- Security protocols, including encryption, decryption, and compression protocols
- Networking and communications protocols, including LTE, 5G/6G, Bluetooth, Wi-Fi technologies
- Business methods, user interfaces, and digital platforms, including multimedia, e-commerce and financial services
- Manufacturing automation and industrial controls and medical devices
